Digital Reprint Information

Enclosed are your digital images on CD or DVD. We recommend that you immediately copy all images to your computer's hard drive since we do not keep a back-up copy.

Images will need to be "sharpened" and "color corrected".

The following will help you order reprints:

Digital Images

Most pictures are 12 mega pixels (4,368 x 2,912 pixels) JPEG images. You should be able to reprint up to 24" x 30". Digital images can be touched-up to remove blemishes and you can copy your CD or DVD and distribute or email to friends and relatives.

Picture Number

Review your pictures and choose your favorites. Once you decide, make sure you have the correct picture number before ordering reprints. As an example, the file should be labeled like this: **012 Last Name.JPG**. In this example, the picture number is "012". **Please list file names in numerical order**.

Size of Reprint

See the Reprint Prices section for picture sizes. The most popular sizes are 5x7 and 8x10.

Quantity of Reprints

Remember relatives and friends. Discounts are available for multiple, same size reprints of the same image.

Finish Type

Options include matte (non-shinny), glossy (shinny), lustre and canvas. Not all options are available at every lab.

Color or B&W

Color digital pictures can be converted to B&W, but B&W can not be converted to color.

Special Instructions

Let the photo lab know what you want before ordering. Cropping the picture, centering the image and printing lighter or darker are the most common requests.

Cost

See the Reprint Prices section for costs of reprints at the recommended photo lab, Motophoto in Naperville.

Are You Ready?

Use the Reprint Order Form to organize your order. Once completed, you should be ready.

Enjoy your photos! And, tell your friends!

Reprint Order Form
